

THINMAN KIOSK

THINMAN FLEXIBLE KIOSK DESIGN

The Thinman kiosks are standalone, walk-up, multimedia kiosks that also provide a light box for advertising or signage.

With its sleek, streamlined design and durable construction, it is the ideal choice for almost any kiosk application.

The attractive curved face and trim options can be customized to fit any environment.

The Thinman also offers additional overhead display options and can be configured in many ways to maximize the value of your marketing and corporate image.

This kiosk can be branded with your corporation's color scheme, logo or advertising materials for the greatest impact.

The Thinman is available in a variety of finishes -metal, bright colors, or wood trim - the Thinman kiosk will blend right into your location's decor.

This kiosk is designed to accept a wide variety of optional components from biometrics to printers, monitors to card readers.

- Swipe Card Reader
- Ticket Printer
- Fingerprint Reader
- Bill Acceptor
- 17" LCD overhead display

Kiosk Services

Amatica's track record in kiosk deployment is second to none. We understand that the kiosk implementation process requires careful management in order to ensure successful delivery.

This starts with pre-delivery consultation to support selection of the appropriate kiosk solution, and site surveys to determine the suitability of potential locations.

Amatica also manages installation of services (telecoms, network and power), kiosk feature

modification and full bespoke kiosk design where appropriate.

Kiosk facilities are most often intended to increase accessibility of information or services. As such, they are invariably located in public spaces, making it critical that installation should go as quickly and smoothly as possible.

Our technicians work to provide turnkey solutions that are fully functional from installation day onwards.

Monitoring

Maximising the uptime of kiosk systems in the field is critical to the success of any kiosk project, and Amatica has developed a number of services to guarantee that downtime is kept to an absolute minimum.

This is particularly critical where kiosks are installed in unmanaged or remote locations, where system failures may otherwise go unnoticed for a considerable time.

Amatica's Remote Monitoring service monitors individual kiosk performance from direct our helpdesk, so remedial action can be taken as soon as a problem occurs. Many issues can be resolved through remote access, making downtime measurable in minutes rather than days or weeks.

Amatica also offers remote content management services to maintain and update kiosk content remotely. This ensures information on your kiosk is kept up to date and relevant.

Maintenance

Even the most robust systems can suffer hardware failures or abuse.

So, should a more serious error occur, Amatica offers a fast response UK-wide hardware maintenance service, ensuring that even if the worst should happen, your services will continue with minimal interruption.

All kiosks are supplied under warranty with additional on-site maintenance contracts available.
